Seathwaite [9th June] - Scafell Pike, England's highest mountain at 977m, is a magnet for fell-walkers of all abilities. This route leaves the busy tourist path and dives feet first into Grains Gill. After splashing about in the sparkling pools of the ghyll, a long enjoyable scramble leads into the heart of the fells, then over Allen Crag up to the summit of Scafell Pike. The return is made via the impressive Corridor Route.

If you wish to join Bob Dixon, Tony Austin, Ian Thomson, Brian Wears, Angela Frankland & Alan Humble on the minibus please contact Graeme.

Great Langdale [23rd June] - There may be some argument as to how many Langdale Pikes there are but there is little disagreement about their superb quality. Lower than their surrounding fells, their distinctive shapes and rock architecture make them outstandingly attractive. This ridge line circuit links four of the possible five contenders (only Thorn Crag is omitted) as well as circling the rest of the Stickle Tarn Skyline.

BOOKINGS OPEN 11th JUNE

Buttermere [21st July] - The long ridge of high land separating Ennerdale from Buttermere is uniformly dull on its Ennerdale flanks and largely given over to conifer plantations, but the northern slopes are as exciting as the southern ones are boring. Here the retreating ice took great bites from the ridge, exposing sharp-edged glacial combs buttressed by fine crags where ravens soar. This is classic fell walking country.
